### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The instant application is directed towards an unobvious improvement in the compressor rotor art. Specifically, Applicant claims the blade roots being inserted into a circumferential groove of the rotor via a filler groove having a width greater in the circumferential direction than one-half of the width of the desired blade pitch and having a first plurality of blades having a nominal blade pitch that is less than the blade pitch of a second plurality of blades that are in an area of the filling groove. The first plurality of blades are in greater number than the second plurality of blades.

While prior art such as 3,778,191 to Brockmann, 6,152,698 to Gregg et al., 6,471,483 to London, and 2005/0129521 to Naudet show rotors having circumferential grooves for their respective blade roots and that filler grooves are present, none of the prior art discloses the blades having different blade pitches in the area of the filler groove as claimed by Applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
